1. Wireless technology

A hand holding a smartphone, with the screen displaying some text. The background is blurred, showing a person in a red shirt. The overall image has a dark, semi-transparent overlay.

Hardware * Dashboards * Applications

WIRELESS THINGS

User Benefits

Energy Savings

Understanding and rationalizing your behavior can lead to significant economies that, according to literature can be as high as 50%

Better Indoor Quality

Energy goes hand in hand with indoor air quality. Technology to monitor and rationalise behavior will have an impact also on the quality of the indoor environment

Progressive Lifestyle

WT comes with a handy smartphone interface, it is a fully fledged smart building platform!

Put your Business in your customer's mobile

SMARTHC
www.hellohoreca.com

Examples of applications loaded in the phone

Simple requests

'Touch and go' or 'text and go' such as call room services, ask to do not disturb, call waiter, ask for technical assistance, etc...

Advanced modules

such as ordering, booking, information, bonus, rating, my account

Complete packages

such as the conference package that allows participants to send or ask questions, vote on panel questions, etc.

3. Data management

The background features a network diagram with nodes and dashed lines. A large, colorful, abstract shape is overlaid on the diagram, consisting of several overlapping circles in shades of blue, green, orange, and brown. The text '3. Data management' is positioned at the top left, and 'Analytics* Machine Learning * Reporting' is at the bottom.

Analytics* Machine Learning * Reporting

What is LEIMINTE?

A cloud solution to automate your data management and reporting requirements

Data management can involve also real time and big data and its analysis can be supported with machine learning and neural network technology

CYPRUS * KOREA * ROMANIA
